Notes:

- (1) Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Inferred Mineral Resources have a great amount of uncertainty as to their existence and as to their economic feasibility. Under no circumstances can it be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher Mineral Resource category or converted to Mineral Reserves.
- (2) All Mineral Resources and Mineral Reserves are reported in accordance with CIM Standards. Unless otherwise stated, for each project the Mineral Reserves stated above are included in the total estimate of Mineral Resources as stated above. All figures are rounded to reflect appropriate levels of confidence. Columns may not add up correctly due to rounding.
- (3) Represents the portion of total Mineral Reserves and/or Mineral Resources notionally attributable to Uranium One's equity interest in the joint venture through which the property is owned in the percentage indicated in this column.
